The **EASY PACKET** locker is manufactured in HPL LAMINATED, compliant with the international standards EN 438 and ISO 4586. The structure made with 6 mm thick panels and 10 mm doors. The uprights are in anodized aluminium, the stratified laminate panels are with scratch-resistant finishes, fixed to a 30x30 painted tubular steel platform which acts as reinforcement base, guaranteeing greater strength to the structure. The system consists of a TFT electronic control unit with a 15" touch screen display, which manages electric locks operating at 12 Volts. Furthermore, a lock allows for emergency opening. In each module there is a driver board for managing the electric locks and the connection between modules takes place via a bus cable.

The main features that this type of locker offers are the following:

- It allows employees to receive parcels in the company independently without requiring staff to collect and sort them with obvious company savings;
- Allows delivery to any courier;
- Can issue a receipt;
- It can be for free use or payment service with currency and / or credit card;
- Automatic sending of the code for collection by email or SMS;
- Remotely manageable;
- Volumetric control compartment: (facilitates the courier in delivering the package);

The **EASY PACKET\_15 TOUCH SCREEN** system is suitable for installation with the system:

- **EASY PACKET EXPANSION**

The TFT control unit can manage over 200 boxes.
