

technical sheet

SAFE LAMINATE for SUPERMARKETS with FRIDGE

- ✓ Stand-alone version;
- ✓ INDEPENDENT SYSTEM, it doesn't need any connection with the supermarket server, it's already working.
- ✓ The remote-control program also works if the system is connected to the internet as a "guest" without being in the supermarket's local network.
- ✓ To deposit the shopping, the supermarket operator simply enters the end customer's mobile phone number, the system sends the information via SMS to the customer with the message "The shopping has been deposited in the closet number and the collection code is the following"
- ✓ It is possible to check / verify the status of deliveries at any time.
- ✓ The following day, the system automatically sends another SMS to the customer in the event of non-collection and the failure to collect the shopping after a certain pre-set period of time is also highlighted (so that the shopping can be picked up and placed again in its place).

technical sheet
SAFE LAMINATE for SUPERMARKETS with FRIDGE

TECHNICAL DESCRIPTION:

Our shopping pick-up locker is manufactured in high pressure HPL LAMINATED, compliant with international standards EN 438 and ISO 4586.

The structure made with 6 mm thick panels and 10 mm doors.

The uprights are in anodized aluminum, the stratified laminate panels have an "anti-scratch" finish, all supported by drawn anodized aluminum, fixed to a 30x30 painted tubular steel platform which acts as a reinforcing base, ensuring greater sturdiness to the structure .

The system is managed by an electronic control unit, by means of electric locks that operate at 12 Volts, with emergency key opening.

In each module there is a driver card for managing the electric locks and the connection from module to module takes place with a bus cable.

In the upper part you can store dry foods that do not require low temperatures, while in the lower part of the door there is a fridge that is CE certified and reaches a temperature of 4°C (suitable for containing meat, dairy products, etc..) with a capacity from 35 to 90 liters for the fridge section and a capacity of up to 50 liters for the freezer.
